30+ years
- Regional specifications
- Back-up / restore of calibration and set-up data

Next generation proprietary software user interface delivers sophistication in a compact footprint. The short boot-up increases job efficiency and allows faster and accurate measurements, every time

Overall dimension:
Length: 3100 mm
Height: 2290 mm
Width: 920 mm

JohnBean™

HD camera with V.O.D.I. (Vehicle Orientation Directional Indicator) constantly monitors the alignment and provides critical information to get the job done right

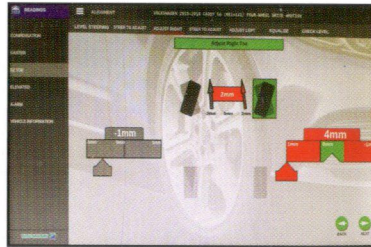

Next generation 3D wheel aligners that move all of the processing out of the PC into a proprietary control unit

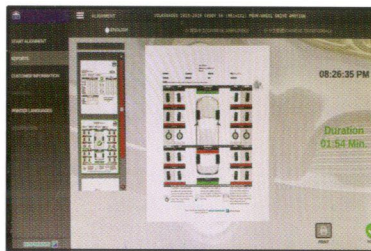

Clear and comprehensive vehicle database selection with quick model search function

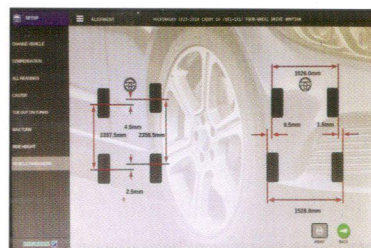

Improved EZ-toe feature eliminates chasing toe adjustment even without using a steering wheel holder

Multiple print reports available to suit your customer's needs

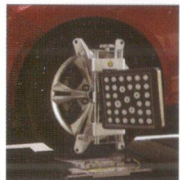

Vehicle dimension for pre-alignment/diagnostic check

Proprietary control unit handles the processing of critical data in a faster and efficient manner.

UI controller handles software processes, such as user interface functions

AC 100 wheel clamps are durable and require minimal maintenance

OPERATOR EFFICIENCY

- Positioning sequence: roll back and split
- Customer data entry
- Advanced customer database
- Customer database import / export / sharing
- Multiple print formats

MEASUREMENTS

- Caster & SAI on turntables
- SAI elevated
- Toe out of turn
- Max turn
- Vehicle dimensions

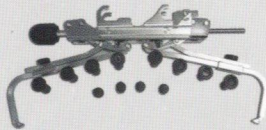

ADJUSTMENTS

- Live caster, camber & toe - turntables
- Live caster, camber & toe - elevated
- A-arm adjust
- EZ-toe
