

CH37 INDUCTION HEATER

Your torchless heating solution

Advanced induction technology means there is no open flame - the heat is generated directly in the work piece itself. The high power CH37 Induction Heater can be used in the same way as a gas torch but with little risk of damaging nearby components. The CH37 has a unique regulation and control system featuring five power levels, making it nearly impossible to overheat. Perfect results are always at your fingertips!

Heat shrinking of steel and aluminum panels during repair

FEATURES AND BENEFITS

- No preparation required, heats through rubber, plastic, glass, paint, etc.
- Will not damage nearby heat sensitive parts
- No open flame, making it safer and more economical than gas
- Total power control, due to the unique regulation- and control system
- User friendly control panel
- High power system quickly heats exactly where the operator chooses

Heat rusted nuts and bolts on suspension, steering and exhaust

Controlled heating without a flame

Heats through rubber and plastic

Does not overheat nearby sensitive parts

Powerful heating tool with flexible on/off switch

Accessories

Angled induction head (standard)

Straight induction head (optional)

Hightech Fluid 3 ltr

Field Amplifier

Technical Data

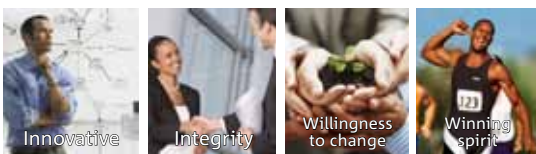

Mains Supply	208-240V 50-60 Hz, 1P 16A
Protection Class	IP21
Working frequency	18 - 40 kHz
Main Supply Power	4 kW
Induction Power (Maximum)	3.7 kW
Induction cable (length)	3 m
Cooling system	Water (decalcified)
Weight (kg)	34
Water tank	20 liter

User-friendly front panel with five power control levels

Effective water cooling system with 20-liter tank
